DETAILED ACTION

Allowable Subject Matter

1. Claims 1-20 are allowed.
2. The following is a statement of reasons for the indication of allowable subject matter:
After reviewing the remarks made by the Applicant in response to the non-final office action the Examiner finds the remarks to be persuasive. The most pertinent prior art is Beier et al "Advanced subtraction angiography: mask selection and image registration" teaches Conventional DSA in cardio angiography is hampered by the rapid and irregular heart movement. Thus, extended subtraction artifacts occur due to the bad congruence of corresponding structures. A native sequence of one heart cycle serves as a pool of mask images. The ECG signal is used to find the corresponding mask image. An image registration algorithm was developed to estimate displacements in numerous (> 6000) local image regions. The resulting motion pattern is used to compute a new warped image with maximum congruence. This calculated image becomes the new mask in the subsequent subtraction. The algorithm works fully automatically and does not need any interaction like the demarcation of landmarks. Better assessment of the coronary vessels and the ventricle with reduced artifacts is the diagnostic benefit of this image enhancement. Nadkarni et al (Image based retrospective cardiac gating for three dimensional intravascular ultrasound Imaging) teaches reconstruct a 3D IVUS image with negligible vessel pulsation artifacts, by developing an image-based retrospective gating method to track 2D IVUS images belonging to the same cardiac phase. Our approach involves selecting 2D IVUS images belonging to the same cardiac phase from an asynchronously acquired series, by tracking the changing lumen contour over the cardiac cycle. None teaches

calculation of a similarity measure between the current image and a representative image, the similarity measure being associated with the phase of calculation of the similarity measure between the representative image and the previous images or a sub-quantity thereof; and selection of those previous images whose similarity measure relative to the representative image, lies in a predetermined range around the similarity measure of the current image relative to the representative image. The Examiner finds no reason or motivation to combine the above references in an obviousness rejection thus placing the application in condition for allowance.

Any comments considered necessary by applicant must be submitted on later than the payment of the issue fee and to avoid processing delays should preferably accompany the issue fee. Such submissions should be clearly labeled, comments on statement of reasons for allowance.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to NANCY BITAR whose telephone number is (571)270-1041. The examiner can normally be reached on Mon-Fri (7:30a.m. to 5:00pm).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Bhavesh Mehta can be reached on 571-272-7453. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
